JOSEF DAVIDSSONS EFTR.
VEDSPISAR, KAMINER & TILLBEHÖR

Josef Davidssons 320

Part. no: 100032003, top connection

Part. no: 100032004, rear connection

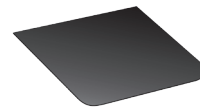

Timeless design with glazed fireplace hatch and tight exterior dimensions make Josef Davidssons 320 an attraction in both new and older kitchens. Only 5 cm lightweight concrete is required as a firewall on either side. Modern fireplace where the fuel is burnt through the supply of secondary air via holes in the vermiculite walls, for maximum efficiency. The convection system will ventilate the stove while heating the room air. For newly built houses or in mechanical ventilation the stove is prepared for outdoor air connection. Handle made of oak. Chimney connection at the rear or top.

Accessories

Extension kit

Powder coated black
Gives the height 900-920 mm
Part. no: 100032860

Floor panel

Powder coated black
500x400 mm.
Part nro: 990000501

Fan/Heat mover

Height 180mm
Blade width 180mm
Part. no: 990001026

Technical data

Power (kW)	6	Weight (kg)	140
Efficiency (%)	78	Length of firewood (max mm)	370
Heating surface (m ²)	30-70	Approval Certificate	0386/04
Height (mm)	850-900 (920)	Flue pipe dimension Ø (mm)	125
