JOSEF DAVIDSSONS EFTR.

WOOD-BURNING COOKERS, STOVES & ACCESSORIES

Increased comfort

Josef Davidssons Eft. started production of the Småland Kitchen Range way back in 1896. Since then continuous development and improvement have resulted in one of the most complete traditional kitchen stove ranges available anywhere. The factory, in Reftele in southern Sweden, hand builds kitchen ranges blending the very best of modern technology with time served traditional craftsmanship learned over the last 150 years.

Their Swedish wood burning ranges increase both the value and the quality of life in any home. No electrical connections mean complete reliability, not even a power cut stops their wood burning ranges from cooking. Great design is not something Josef Davidsson are inclined to change in a hurry, the design of "their treasures" is not fashion dependant. Their genuine wood burning range are true classic designs, able to grace the most traditional or contemporary settings.

The VIKING 75 and 60. Austrian quality kitchen ranges complement the Josef Davidsson traditional range and take their place in the hypermodern kitchen where cosiness is valued just as highly as quality, design and function. It should be easy to take pleasure in life – for example, from freshly-baked bread from the kitchen range, a pot of fresh coffee and a warming fire fuelled by wood, the Viking belongs to the future.

Mikael and Markus,
Josef Davidssons Eft.

A Viking in the kitchen

Do you worry about heating and electricity? Are you thinking about secure alternatives? Look no further, a wood burning range is a cheap and environmentally friendly source of heat. With unbeatable reliability when you want to cook and bake. When you choose the right kitchen range, it can even be the most economical, reliable and gentle method of all.

Viking 75, as the name implies, is a 75 cm wide wood burning range. That is, a slightly larger model that provides an extra roomy oven with a large hearth for rapid heating and enjoyable cooking.

Viking 75 in white with 10 cm wide convection sides.

◀◀ **EASY TO CLEAN STEEL HOB**

Viking is delivered as standard with lacquered steel hob for maximum durability and wear.

BLENDS IN ▶▶

With convection sides, Viking can be integrated directly into your kitchen furniture. Available in 5.5 and 10 cm wide.

Wood fuelled high tech

When the world outside is rushing faster and faster, we seek out the genuine and simple. Time is a luxury we gladly indulge in, above all in our daily lives. This is where the kitchen's hero, the wood burning range, enters the picture – especially if it bears the Viking name. This is your guarantee of an environmentally approved wood burning range with the latest combustion technology in a timeless design for the modern kitchen.

Viking is delivered as standard with a lacquered steel hob. The entire hob acts as a hot plate and the removable hot plate can make way for a wok. It should be an easy and relaxing experience to cook in a genuine way.

◀◀ **VISIBLE FIRE**

Viking is also available with a glass ceramic hob as an option. Then you can see the glow of the fire from above.

DRY FUEL ▶▶

The practical firewood drawer keeps the firewood. Pull-out plates above protect it while the chimney is swept.

Viking 75 in anthracite-grey with 5.5 cm wide convection sides.

3 years guarantee*

Comfort Zone

In our Viking range, tried and tested technology meets innovation. Efficient and environmentally-friendly combustion means the maximum energy of the firewood can be extracted to provide uniform heating. Viking becomes your comfort zone; a tool that always does its job, in all weathers and situations. It is also the first wood burning range in the 60 cm standard width with a glazed hearth door. This increases the comfort factor and you no longer have to open the door to check the fire. Add convection sides and the Viking is approved for positioning directly against flammable material.

Viking is available in white and anthracite-grey and with the hearth to the right or the left.

3 years guarantee*

VIKING 60

Power (kW)	3-7
Flue pipe dimension (mm)	Ø 120
Weight (kg)	120
Height/Depth/Width (mm)	850 or 900/600/600
